

GF TALES

The "GF TALES" is the world's first suspended fireplace with a bioethanol automatic burner, designed from the drawing of a circle. It can burn for 15-25 hours long. It is a versatile and adjustable piece that reveals the beauty of the flame. The possibility of rotating the two components of the piece opens the way for the contemplation of a dancing flame that takes over the environment, creating a warm and comforting atmosphere. With a sculptural design and simply charismatic, "GF TALES" does not leave anyone indifferent.

Available Finishes: Black Titanium – coated brushed stainless steel
